The Weights & Measures Program has the responsibility for insuring fairness in all commercial transactions involving weighing and measuring devices. The Department also maintains a Metrology Laboratory which certifies weighing and measuring testing equipment to validate the accuracy of these standards. The lab certification services are available for government, commercial and private entities.

Primary duties include the testing, inspection, and certification of the following:

- Large Capacity (vehicle and livestock) scales
- Small/Medium (e.g. grocery store/platform) Capacity scales
- Coal and hard mineral system scales
- Liquid (refined fuel) and Liquefied Petroleum Gas (LPG) Meters
- Refinery Meters
- Gas Pumps
- Package Checking

## This program also provides:

- Training and education to the private sector
- Certification of Registered Service Technicians (RSTs). RSTs are licensed to repair and place in service scales, meters and gas pumps
  - Receive and investigate consumer complaints regarding short measure or short weight

## State Resources:

- NIST Handbooks (H-44, H-133, etc.)

NIST Handbooks: The Wyoming Weights & Day has adopted two key resources in their entirety: Handbook 44 and Handbook 133 (titles below). These publications in hard copy can be ordered directly from the

National Conference on Weights & Description (Measures)

- . Online copies are available for the Office of Weights & Description 
  Measures
- Handbook 44: "Specifications, Tolerances, and Other Technical Requirements for Weighing & Measuring Devices"
  - Handbook 133: "Checking the Net Contents of Packaged Goods"

2/3

Handbooks 44 & 133 are an instrumental resource for Registered Service Technicians and the basis for Wyoming's standards during inspection and certification of weighing & measuring devices.
